DÚN na nGALL DIGITAL DONEGAL

EACH

Donegal Digital Transformation Ecosystem

A public-private partnership formed by 8 organisations, including public authority, Institute of Technology, development agencies and private sector, working together with the vision of “Digitally literate communities co-building sustainable enterprises and societal services” in Donegal (Ireland).

Issues Faced

- Need to expand the reach of the Letterkenny cluster to other areas within the County
- Securing staff with the required skills and experience
- Low levels of research activity and adoption of emerging innovation approaches needed
- Challenging provision of quality and sustainable public services

Key Objectives

1.Utilise extended community as the key dynamic to implement digital transformation
2.Build upon the strong foundation of the Letterkenny digital cluster to create new enterprises
3.Increase the level of digital research and innovation being carried out to allow us to address future generations

Main Results

Since 2014, concrete actions carried out to:
- Encourage existing businesses to use digital processes
- Improve the innovation by launching new research initiatives with the 3rd level sector
- Improve the digital skills of workers through training
- Enable the public sector to create new digital public services
- Creation and support of local Digital Innovation Hubs (DIHs)

Increase Digital Research and Innovation

Deepen the Letterkenny Digital Cluster

Build Strong Donegal Digital Communities
